PRIMARY EXAMINER

1. Claims 1-17 are allowed.

2. The following is an examiner's statement of reasons for allowance: The prior art of the record fail to teach or suggest singly and/or in combination an image encoding and decoding device comprising a transformation component which transforms given image data into transformation coefficients by subjecting this data to a frequency decomposition, a deciding component which divides, the transformation coefficients produced by the transformation component into a selected region on the image and a non-selected region other than the selected region, and encoding components which encodes the transformation coefficients by preferentially allocating a greater quantity of information to the selected region than to the non-selected region, wherein the dividing component performs an equation evaluation of numeral equation data that stipulates the boundary of the selected region, and determines whether the transformation coefficients belong to the selected region on the basis of the results of the equation evaluation, and also carries out the inverse process as prescribed for in the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
